

## FIGMA: LAYERS OF HACKING

---

Tool to Misuse: Figma (ONLY Figma)  
No Photoshop, Illustrator, InDesign, or other software.

---

Create an A4 portrait poster with the headline: "LAYERS OF HACKING"  
Add ONE short supporting sentence of your choice, for example:  
- "Every layer tells a story."  
- "The interface hides as much as it shows."  
- "Structure emerges when control is released."  
(Or invent your own.)

---

Format Constraints  
- A4 (portrait)  
- Export as PDF or JPG

---

MISUSE RULE: Explore Figma in unusual ways

This means:

- You may use photos (from Figma's built-in resources or upload your own).
  - Focus on layering, overlapping, resizing, and combining text, shapes, and images in unexpected ways.
  - Use frames and groups creatively – e.g., a frame as a background pattern or a text box as a visual element.
  - Play with opacity, blending, and masking.
- 

## REQUIRED ELEMENTS

Your poster must include:

1. Headline (visible and prominent)
2. Supporting sentence
3. At least 3 layers of shapes, text, or photos
